

ADVS Assessment [2019-2020]

Emphasis: Biotechnology

Skills and Career Competencies [SCC]: Learning Outcome [LO] #1

Semester/Course: Fall 2019: ADSV 5260: Methods in Biotechnology: Molecular Cloning

Artifact: Primer Design Lab

The Primer Design Lab is an assessment of SCCLO #1. The assessment measures the student's ability to understand and perform molecular cloning through designing several pairs of PCR primers for several different purposes as outlined in the lab and identifying information for each pair and marking the locations of the primer in the sequence.

1. Understand and perform molecular cloning
