

Artifact BT DKLO #3 | Week #6 Quiz: Blood, Circulation, Respiratory System, & Urinary System | Spring 2020 Semester | ADVS 2200 | Instructor: Karl Hoopes

Week #6 Quiz is an assessment of DKLO #3. The assessment uses a traditional multiple choice format to measure the student's ability to demonstrate a working knowledge of chemistry, including Inorganic, Organic and Biochemistry.

Hemostasis is achieved by all of the following except?	0.79	**	1.00	1.59 (2 pts)
The final result of the clotting cascade is the conversion of fibrinogen to _____ by thrombin?	0.86	**	0.98	1.77 (2 pts)
Nucleon number, which biological macromolecule?	0.86	**	1.00	1.73 (2 pts)
The innermost layer of the heart wall is the?	0.83	**	1.00	1.67 (2 pts)
The part of the vascular system where blood is oxygenated is the?	0.75	**	1.00	1.50 (2 pts)
The hemostatic cells, which run from the capillary reaches to the arteriovenous shunt, are the?	0.67	**	1.00	1.33 (2 pts)
What is the correct path of blood flow through the following structures?	0.31	**	1.00	0.63 (2 pts)
Before entering the right atrium, blood is in the?	0.71	**	1.00	1.42 (2 pts)
Which of the following structures contains developed dendrites?	0.70	**	1.00	1.40 (2 pts)
On leaving the right ventricle, blood moves into the?	0.82	**	1.00	1.63 (2 pts)
Which is the following is the parameter of whitefish?	0.79	**	1.00	1.58 (2 pts)
Which part of the cardiac cycle refers to relaxation of the ventricle?	0.91	**	1.00	1.81 (2 pts)
If the heart rate of an animal is 40 beats/min, its heart rate percentage was 100% if the normal value was 30 beats/min and 4 was used, what would the cardiac output be in ml/min?	0.74	**	1.00	1.48 (2 pts)
The following are types of blood vessels except for?	0.94	**	1.00	1.88 (2 pts)
Which part of the vascular system does not carry oxygenated blood?	0.85	**	1.00	1.71 (2 pts)
Subtle incisors when?	0.47	**	1.00	0.94 (2 pts)
The lymphatic system performs all of the following functions except?	0.70	**	1.00	1.41 (2 pts)
Which of the following is not an organ of the respiratory system?	0.85	**	1.00	1.69 (2 pts)

Which of the following structures has the most highly specialized?	0.65	**	1.00	1.29 (2 pts)
The mediastinum is defined as?	0.97	**	1.00	2.00 (2 pts)
The pleural cavity is?	0.89	**	1.00	1.78 (2 pts)
The respiratory system functions include ventilation, gas exchange, and cellular respiration.	0.79	**	1.00	1.58 (2 pts)
Expiration occurs when?	0.82	**	1.00	1.65 (2 pts)
At the level of the aorta, how does blood become oxygenated in the lungs?	0.65	**	1.00	1.29 (2 pts)
Which of the following molecules in the serum is the strongest stimulus to increase respiratory rate?	0.50	**	1.00	1.00 (2 pts)
The urinary system functions include all of the following except?	0.70	**	1.00	1.40 (2 pts)
Where in the body can transitional epithelium be found?	0.88	**	1.00	1.75 (2 pts)
What is the functional unit of the kidney?	0.73	**	1.00	1.47 (2 pts)
