

ADVS Assessment [2019-2020]

Emphasis: Biotechnology

Skills and Career Competencies [SCC]: Learning Outcome [LO] #3

Semester/Course: Fall 2019: ADSV 5260: Methods in Biotechnology: Molecular Cloning

Artifact: Plasma Miniprep Lab

The Plasma Miniprep is an assessment of SCCLO #3. The assessment measures the student's ability to understand and perform protein purifications through a lab procedure where students will prep for DNA extraction and purification of plasmid DNA from bacteria.

Waiting on Datas Outcome from Professor

3. Understand and perform protein purifications
