TECHNOLOGY & ENGINEERING EDUCATION, MS

Develop Skills to Improve Technical Instruction

The technology and engineering education master's program is designed for professionals who want to improve their knowledge and skills in curriculum development, research methods, current educational theory, and evaluation and assessment.

You will complete both professional courses related to technology and engineering education, as well as courses in career and technical education. By working regularly with you chair and committee members, you will produce thesis research you can use in your current profession.

Prepare to Boost Your Career in:

- Postsecondary Engineering Teacher
- Industrial Safety and Health Engineers
- Instructional Coordinator
