

Degree Works Responsive Dashboard Tip | PLANS

VARIABLE CREDIT COURSES

At this time, in order to change a variable credit class from the maximum number of credits that are built for the course in Banner, you will need to add the course from the left sidebar (by selecting "Course").

The image shows a screenshot of the Degree Works 'New Requirement' form. On the left is a sidebar titled 'Requirements' with a menu icon at the top. Below the title are six options, each with a plus sign: 'Choice', 'GPA', 'Non-Course', 'Placeholder', 'Course', and 'Test Score'. A red arrow points to the 'Course' option. The main form area is titled 'New Requirement' and has a close button (X) in the top right. It contains several input fields: 'Requirement type' (Planned Course), 'Term *' (Fall 2020), a checkbox for 'Critical', a search field containing 'ELEC 1XXX' with a magnifying glass icon, and a text field for 'Credits' containing '25.0'. A red arrow points to the 'Credits' field. Below the search field, it says 'You searched for: ELEC 1XXX'. There are also dropdown menus for 'Minimum grade', 'Campus', and 'Delivery'. At the bottom are 'Save' and 'Cancel' buttons.

This applies to "real" variable credit courses as well as "dummy" courses such as ELEC 1XXX. Degree Works will always display the maximum number of credits that are built in Banner for a course, but it can be adjusted when the course is added through the sidebar (Course).
